

SR 26 Mainline Improvement Project
Public Workshop – October 15, 2013
4:00 PM to 7:00 PM

On Tuesday, October 15, 2013 DelDOT held a public workshop for the SR26 improvement project at the South Coastal Public Library. The purpose of the workshop was to present information pertaining to the upcoming construction on SR26.

The opportunity for the public to provide written comment was not included as part of the workshop, as the project has already been advertised and is pending award. The purpose of the workshop was to reacquaint the public, residents and business owners with the project scope, intent and construction schedule.

Overall, the material presented was well received and most of the concerns expressed were related to individual impacts. Most people wanted to know when the contractor was going to be working in front of his/her property. As the SR26 project moves into construction, DelDOT and its contractor (George & Lynch) will host monthly public meetings to address concerns of those impacted by the project.

The workshop was attended by approximately 150 people, including Senator Gerald Hocker and Representative Ron Gray.
